Whole Person Care Continuum

Episodic Care

A focused intervention targeting a patient's emergent need, with a beginning and an end.

Coordinated Care

Deliberately organizing care activities, sharing information to achieve more effective care.

Whole Person Care

A complete personalized care experience including health and social services in a patient-driven manner.

Whole Person Care Continuum

Episodic Care

- Immediate needs focus
- Limited or no integrated care networks
- Basic information & referral process
- Limited or no cross-sector collaboration
- No shared risk or resource allocations/ budgets
- Health care and social care significantly separated
- DEI Awareness

Coordinated Care

- Some shared cost & quality data
- Addressing immediate needs along with a prevention focus
- Person-centered care models
- Some but limited functionally integrated information technology
- Limited scope cross-sector collaboration
- Integrated care teams
- DEI Plans Implemented

Whole Person Care

- Fully realized individual and population health strategies
- Shared definitions of success for social and health care
- Fully integrated networks capable of addressing whole person needs
- Learning organization/ network capable of quick adoption of best practices & adjustments
- Functionally integrated E-health technology and telemedicine options
- Shared budgeting & revenue forecasting
- Continuous DEI work

Whole Person Care: Investing in Health

We see whole person care as a paradigm shift to reflect what matters most to people and how they want to interact with the health care system.

- ❖ Represents seamless connections of key determinants of health: Physical, Emotional, Social, Economic, Spiritual, Behavioral
- ❖ Approach recognizes all factors are connected and impact health, requiring a “whole-person” approach to care
- ❖ Its success depends on the ability to create new relationships. Relationships are what help create value for people interacting with the health care system. Relationships help support people and their goals.

Whole Person Care Strategy
